Summer 23

ma.m2.2 Design I

course

Prof. Kazu Blumfeld Hanada

lecturer

Fluid Territories_Architecture of the Garden

title

After the pandemic, in addition, current global conflict, we senses the fundamental shifts of paradigm are expected with new concerns on life in general, how we work, how we eat, how we perceive nature, how we sustain our environment. At this actual context, we see already the new tendencies towards re-defining the cities, suburban or rural territories, globally. Above such concerns, our attempt in this semester will be to intervene hypothetical state of migration of suburban.
As a case study, Kreisstadt of Steinfurt, 30km. north-west from Münster, will continue to corporate our research. This semester, along concerning new sustainable suburban development, we try to emerge new vision for LAGA (Landesgartenschau 2029) along the strategy towards circularity. Circularity would deal with circular economy and thus describes the complex path to sustainable socio-economic development.
Attaching to this master course, our Super-Studio offers the critical analysis and re-construction of unbuilt projects von Mies van der Rohe, particularly focus on the notion of the method of threshold among territories, dialectics of in-between
