

You can use Matlab

and

are you are interested in a position as a student assistant?

Then the laboratory for biomechanics is the right place for you.

We are looking for a student with good Matlab skills in signal processing. Your task will be to read in measurement data and process and evaluate it according to defined criteria.

We offer you a position with 3-6 hours per week with flexible time management.

Are you interested?

Then we look forward to receiving an email from you at biomechanik@fh-muenster.de. Please also briefly describe what you have done with Matlab so far.
